CartRank Playbook

📌 CartRank tracks your brand's visibility across ChatGPT, Perplexity, and Gemini.

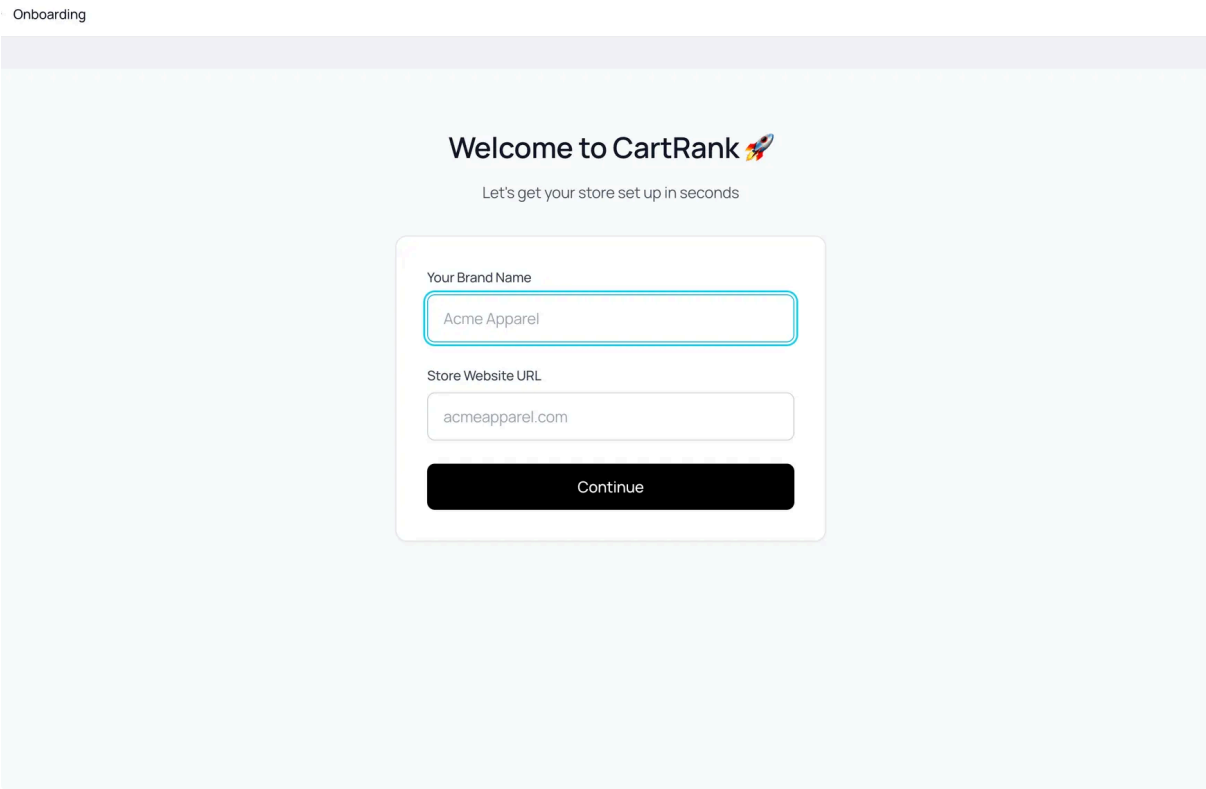
But tracking is only useful if you know what to do with the data.

This guide breaks down each feature and shows you how to get the most out of it.

What to look at, what it means, and what action to take.

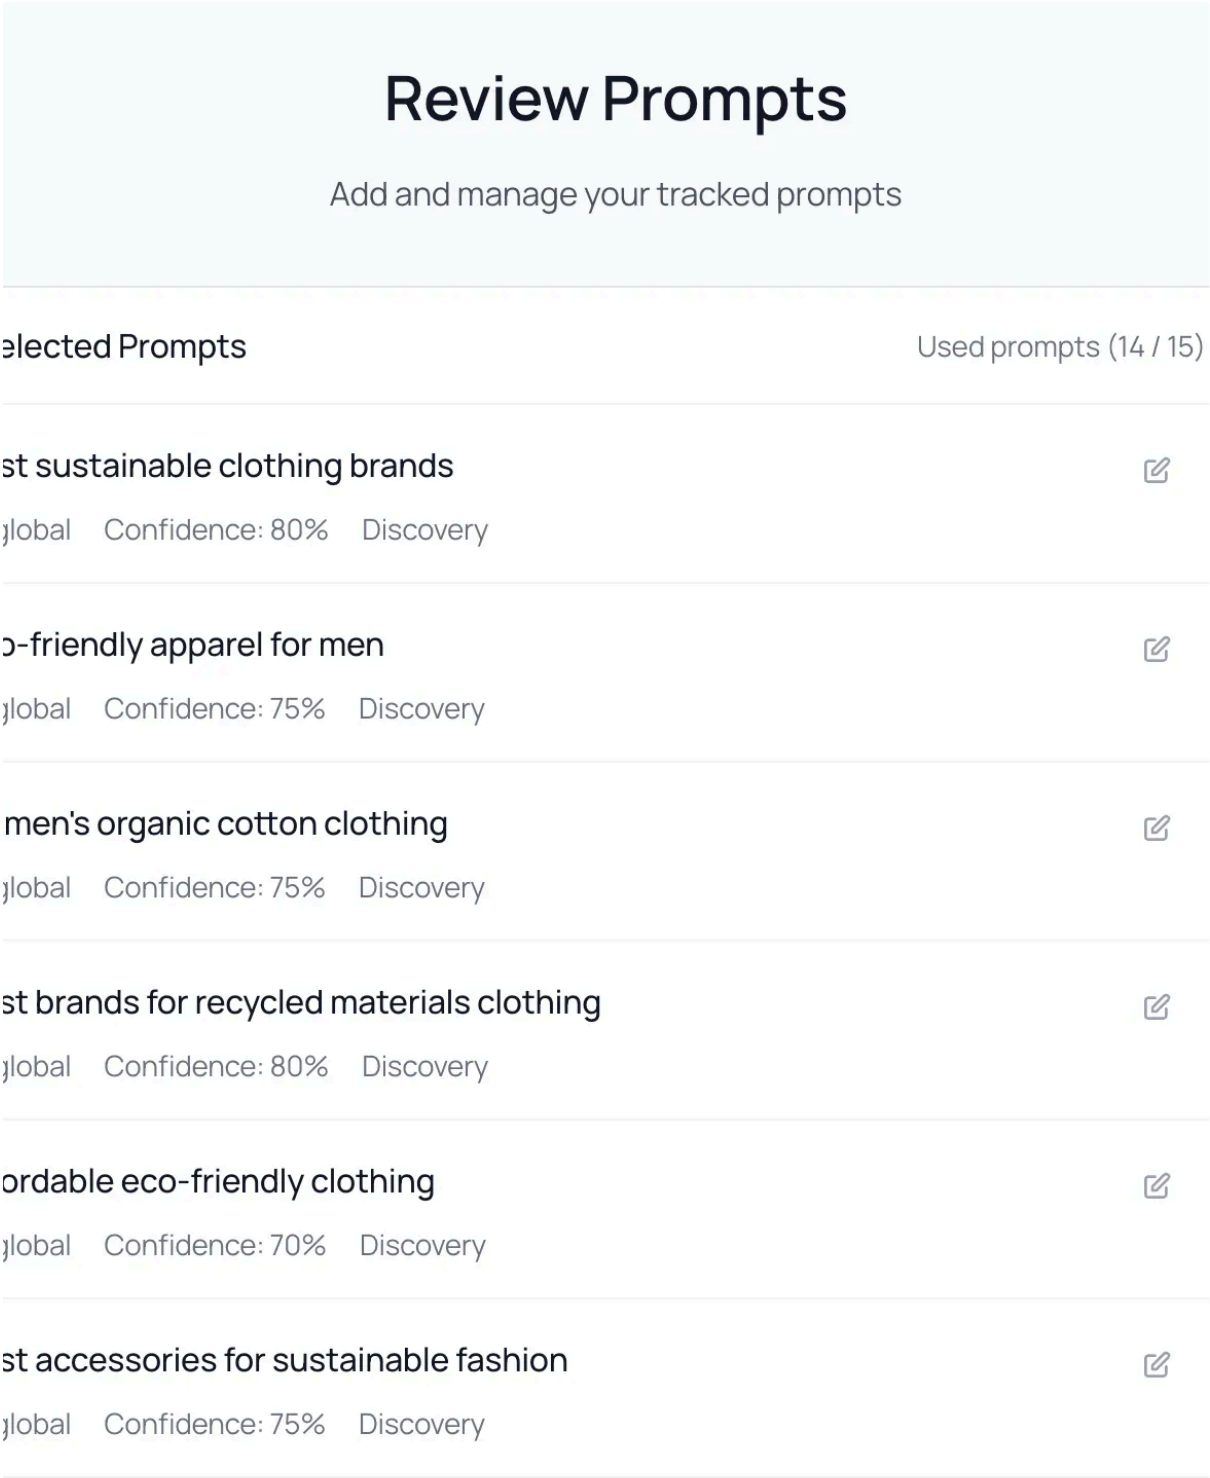
Access The Tool here: https://cartrank.ai

1. Complete the onboarding



CartRank will:

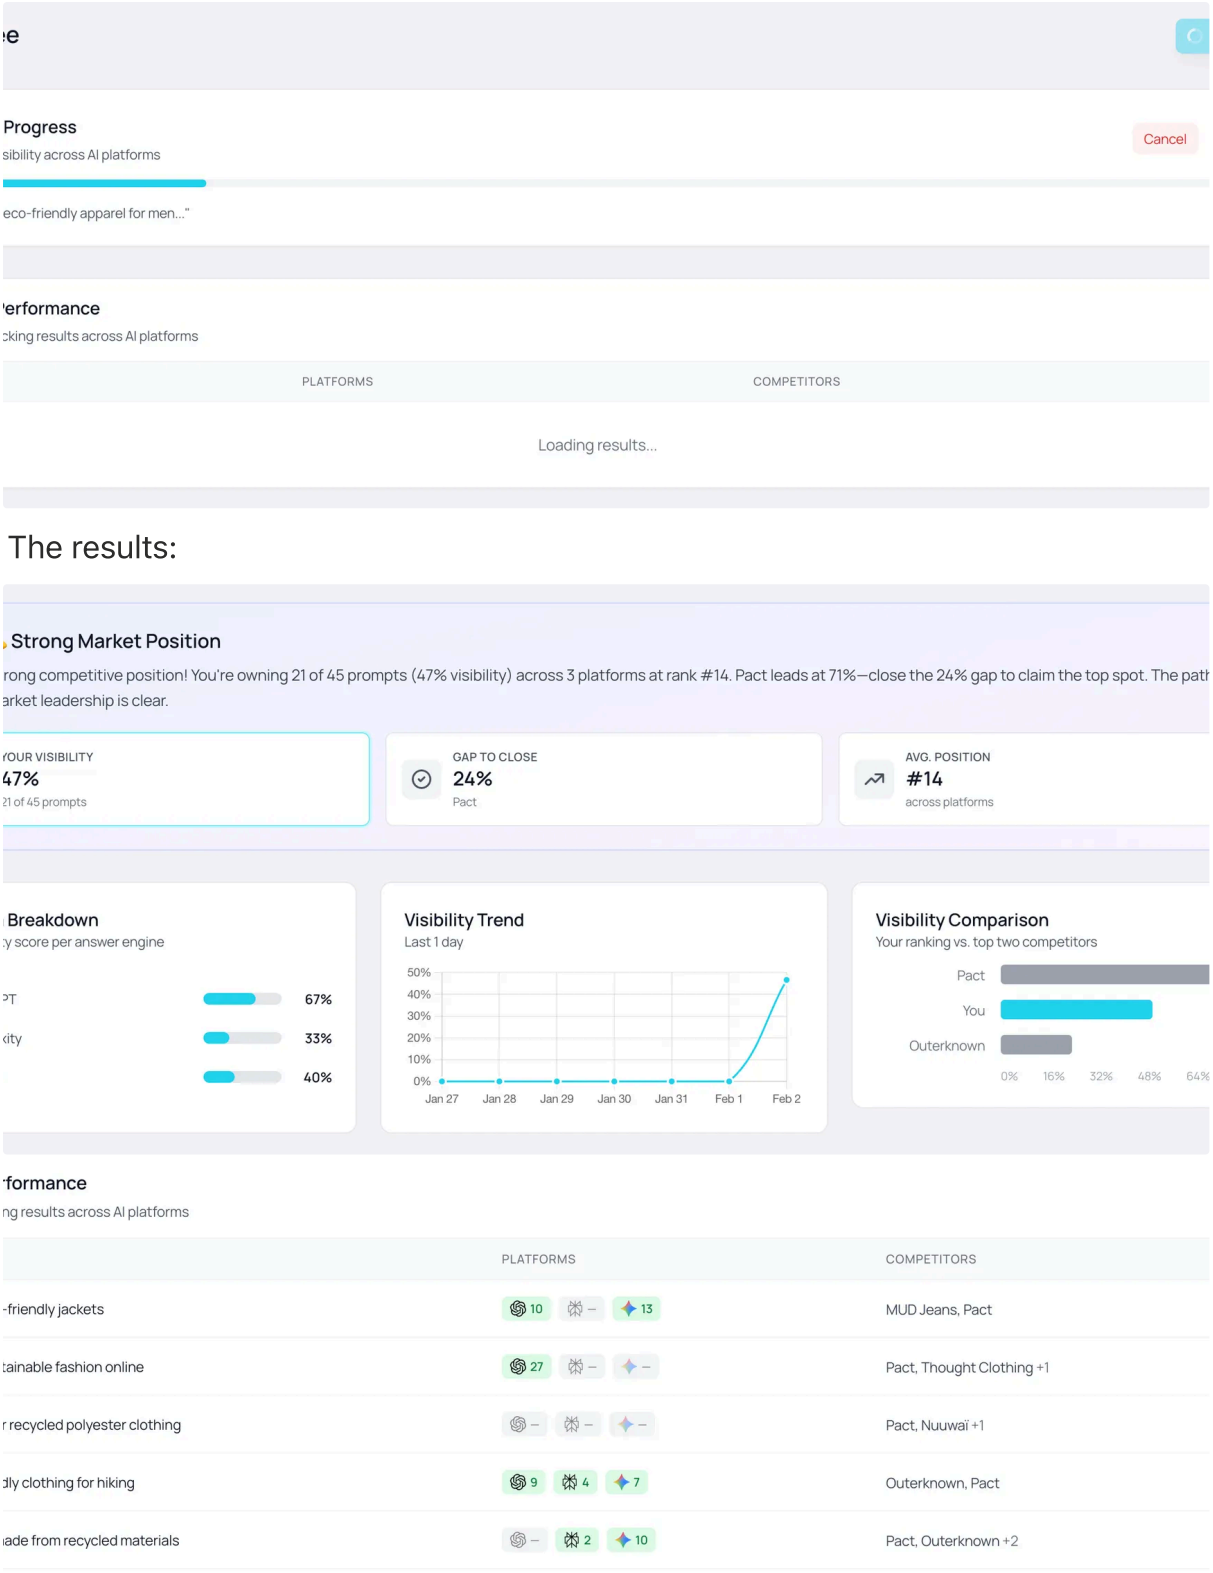
- Pull all the information it needs about your store
- Find competitors
- Identify the most relevant prompts to track your AI visibility



2. Dashboard

Once you've finished your onboarding and you're in the Dashboard, click on "Track Visibility".

Our proprietary algorithm will do a deep dive and find detailed tracking results across different AI Platforms.



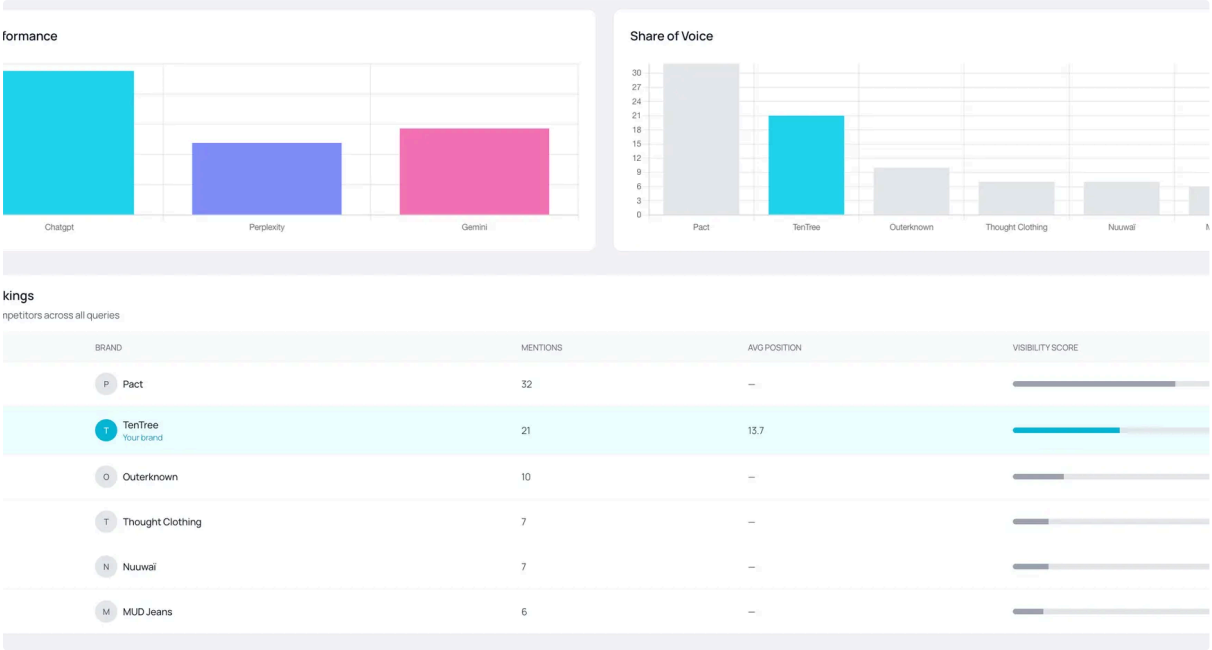
3. Visibility

Go to the “Visibility” feature to find your:

- Platform performance

- Share of Voice (compared with competitors)

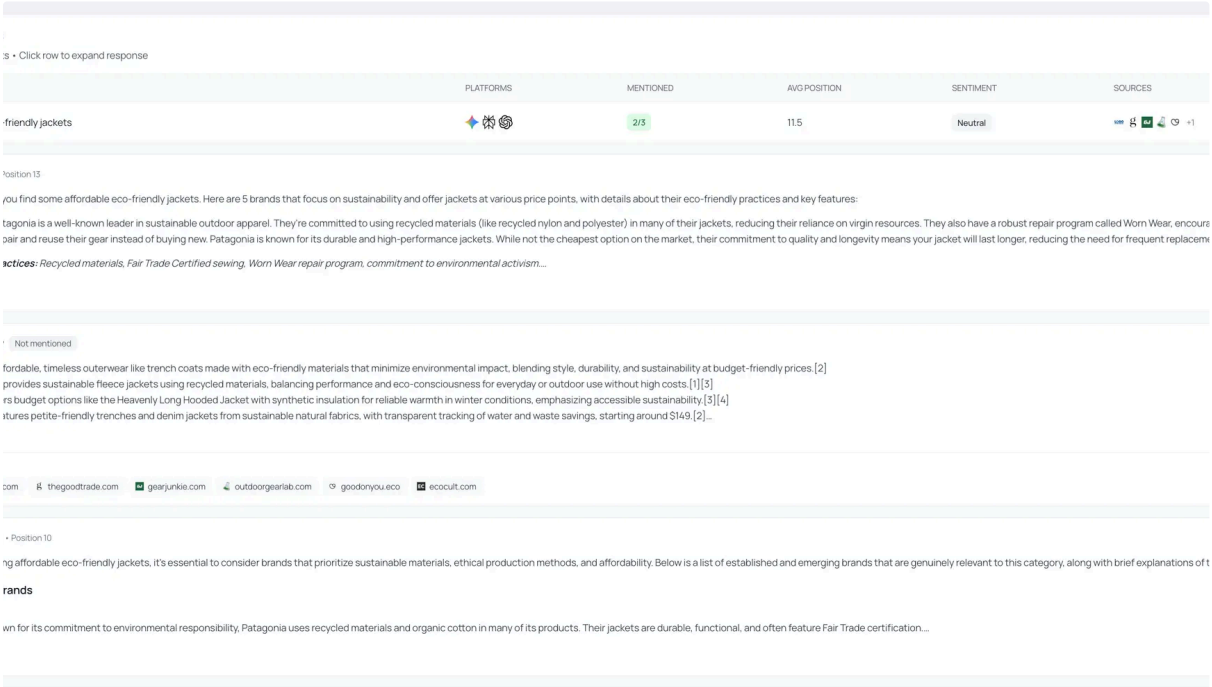
- Industry Ranking (# of mentions + avg. position)
- Cited sources



4. Mentions

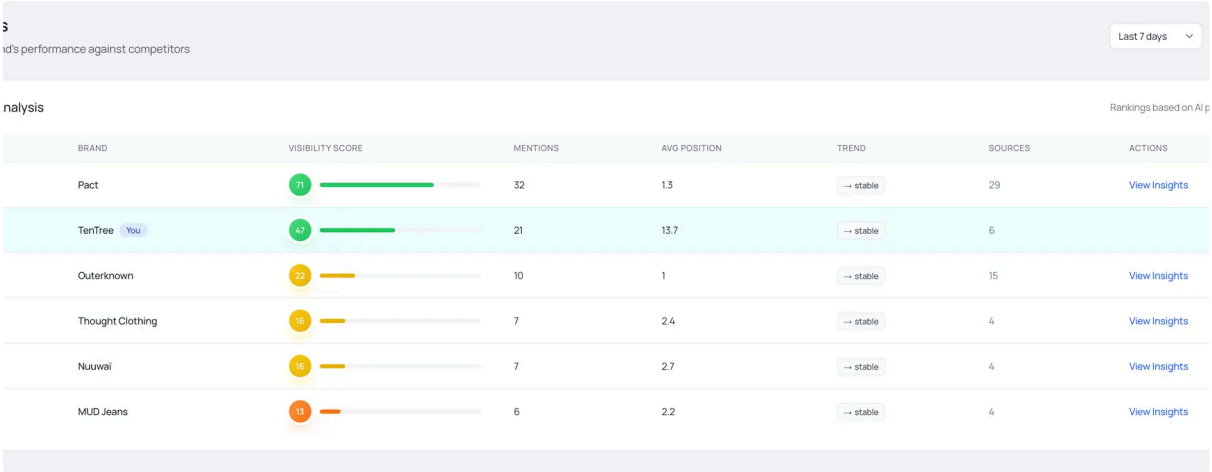
Go to the “Mentions” feature to find:

- What prompts you’re ranking for
- Average position
- Cited Sources for that prompt



5. Mentions

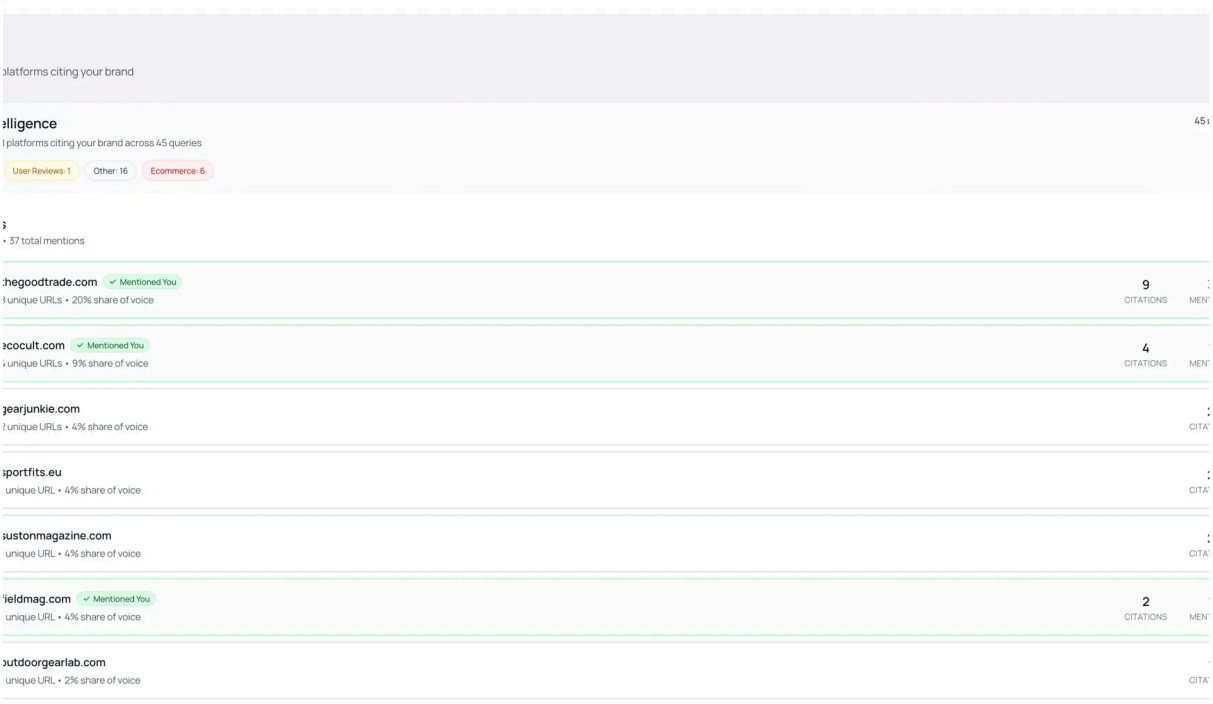
Go to the “Competitors” feature to find which ones of your competitors is ranking the highest in AI search so you can reverse engineer their strategy.



6. Sources

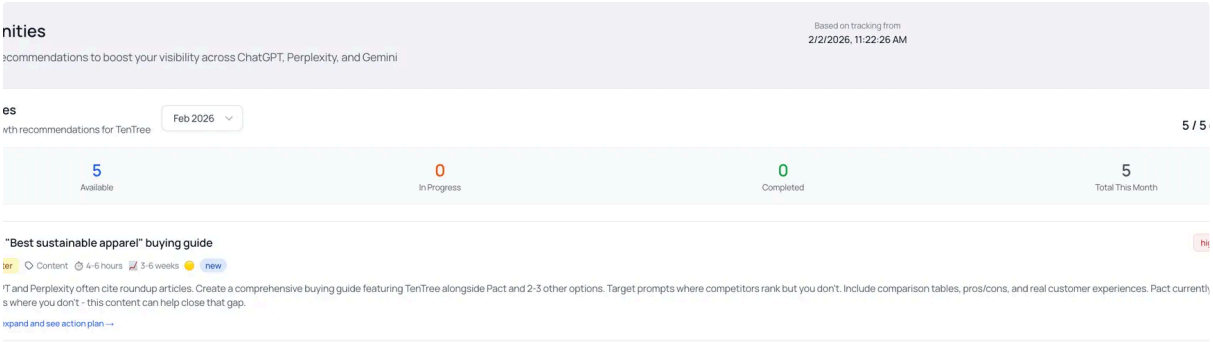
Find out how many citations and mentions you’re getting from each source.

This will help you identify the best websites to keep on getting mentioned.



6. Opportunities

CartRank will identify and suggest recommendations on what you can do to improve your AI Visibility. (i.e. Write a Buying Guide.)



7. AEO Audit

You can run audits on your product page, collection pages or landing pages to audit for GEO (Generative Engine Optimization). This will give you a detailed
